

ATTILA NAGY

Front-End Web Developer

ABOUT ME

I am passionate about learning the latest and greatest technologies and frameworks. Software development has never been just a job for me, but a challenge to grow as a professional. I am looking for opportunities to learn and expand my technical skill set in a team-based atmosphere.

SKILLS

HTML5 | CSS | JavaScript | React | Redux | jQuery
Docker | Git | Firebase | SQL | Java | AJAX

PROJECTS

You can check the projects I worked on in my portfolio: natesz.github.io

MyPlaylist App:

University project for Front-End Web Development course. Used hooks, React router and Semantic-UI for styling. Got a good understanding for CRUD operations, Virtual DOM and Forms. I utilized React Redux for state management.

Burger-Maker App:

I learned the fundamentals of React while creating this project, for example: Components, JSX, Rendering, Events, State, Props, Lifecycle, Lists. and keys. For database I used Firebase firestore.

Amazon Clone:

For styling I tried Material UI. For state management I used the Context API. The authentication and the deploying is managed by Firebase.

Football results WebApp:

The http requests I handled with axios and the useEffect hook. Deployed with github pages.

EXPERIENCE

2019 aug –
2020 aug

Software Intern at GE Healthcare

- Containerized several applications; one of them was a MERN stack application.
- Presentation about React for the entire organization.
- Wrote test cases for automation.
- Worked in agile environment with experienced senior developers.

EDUCATION

2018-

Eötvös Lorand University – computer science

LANGUAGE

English: Intermediate
